(A) Screening rejects weakly routed evidence

	Route use	Cost	Robustness	Decision
Depth	0.18% 0.07% 0.34% 0.11% 0.42% <1% selected	high	mixed / unstable	DROP
Segmentation	0.63% 0.21% 0.74% 0.39% 0.56% <1% selected	high	region cue overlaps bbox + edge	DROP
Caption / query text	input input input input input not routed	high latency	negative transfer	DROP

(B) Higher cost does not yield reliable gains

Retained routed evidence bank

bbox | edge | motion | relation
